

SMART INDIA HACKATHON 2025

- **Problem Statement ID –SIH 25031**
- **Problem Statement Title-Crowd sourced civic issue reporting and resolution system**
- **Theme-Clean and Green Technology**
- **PS Category- Software**
- **Team ID-**
- **Team Name –Alt Tab Adapt**

Proposed Solution

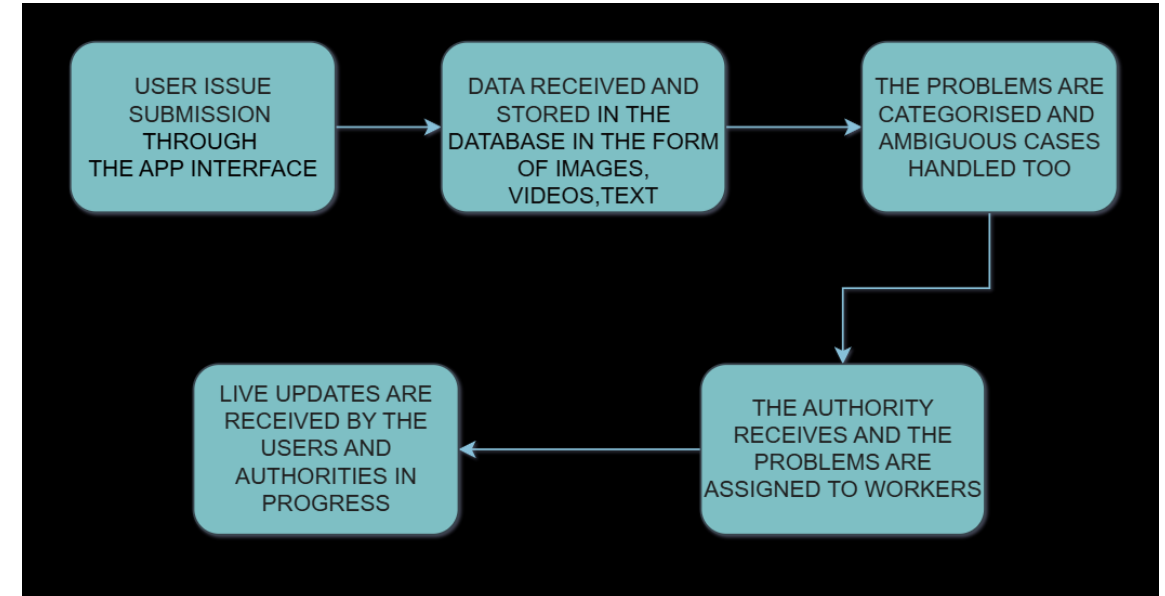

- Solution: Location-based app for citizens to report civic issues with photo, text and GPS.
- Problem Addressed: Avoids duplicate complaints, ensures categorization and real-time status tracking.
- Innovation: AI-powered issue classification with multi-department routing for ambiguous cases.
- Uniqueness: Public and media visibility ensures transparency and accountability.
- Impact: Empowers citizens, streamlines governance, and accelerates issue resolution.

- **Technologies used:**

- FRONTEND → React Native
- BACKEND → FastAPI(Python)
- DATABASE → PostgreSQL
- STORAGE → AWS S3(Or Google Cloud)
- NOTIFICATIONS → Firebase Cloud Messaging

- **Development Flow:**

- (1) Frontend (React Native): User submits issue
- (2) Backend API (FastAPI /Django): Receives data, stores in PostgreSQL.
- (3) Classification Logic : Backend checks issue category and region; authority assignment done.
- (4) Admin Panel: authority logs in; views assigned values.
- (5) Notifications: user and authority gets updates.

FEASIBILITY AND VIABILITY

Analysis of the feasibility of the idea

- Vital for rural areas with low response rates to civic issues.
- Delays affect daily commute and quality of life.
- Easy-to-use system empowers citizens to report issues.
- Ensures accountability and timely resolution by local officials.

Challenges & Risks

- Misuse for political propaganda or fake issues and curiosity misuse
- Low citizen adoption
- Government resistance
- High report volumes (scalability)
- Data privacy concerns

Strategies

- Fining system to prevent misuse
- Strict verification and filtering of reports
- Regional language support and awareness drives
- Pilot projects to build govt. trust
- Cloud auto-scaling to handle load
- Strong data encryption & privacy measures

IMPACT AND BENEFITS

Potential impact on the target audience

- Helps citizens track and resolve commute-related problems on their own
- Guides users who are unaware of government procedures and contacts
- Provides an easy-to-use interface for illiterate users to voice their problems

Benefits of the solution

- Reduces paperwork and physical storage
- Supports voice notes & video submissions
- Easy-to-use interface, minimal prior knowledge needed
- Automatic problem categorization for proper handling
